SUMMARY

Final-year engineering student specializing in computer science and financial engineering, with strong skills in software development, data engineering, and artificial intelligence applied to finance.

PROFESSIONAL EXPERIENCE

Front-End Developer Intern – Alenia Consulting (Spain) Mar–Sep 2025
- Design and development of an application management and company tracking tool, including data extraction from Boond.
- Technologies: Node.js, Angular, Python, REST API, Docker, GitHub, Agile methodology.

FinTech Developer Intern – INSIGHT PLUS Jul–Aug 2024
- Web application for FX transaction management, API integration, and responsive user interface.
- Technologies: Node.js, Angular, REST API, Spring Boot, JWT, Git, Agile methodology.

Stock Management Developer Intern – HYPRO Jul–Aug 2023
- Development of a stock management application including product tracking and supply coordination.
- Technologies: Node.js, Angular, Symfony, PostgreSQL, Agile methodology.

ACADEMIC PROJECTS

AI-Based Trading Simulation Application
Interactive platform simulating trading sessions with portfolio management, order execution, and real-time graphical visualization. The application integrates AI to provide personalized recommendations and progressive learning of financial markets and trading mechanisms.
Technologies: Node.js, Angular, Spring Boot, JWT, PostgreSQL, Python, GitHub.

Deep Learning for Portfolio Optimization (Deep BSDE)
Development of a Deep Learning approach to solve BSDEs for dynamic portfolio optimization with transaction costs, applied to BTC/USDT data.
Technologies: Python, TensorFlow/Keras, NumPy, Pandas, GARCH, Monte Carlo Simulation.

AI Prediction System & Collective Finance
Crowdfunding and insurance platform: risk management, contract recommendation, fraud detection.
Technologies: Node.js, Angular, Spring Boot, JWT, Python.

Delivery Management & Order Customization System
Design and development of a delivery management platform with order customization based on customer allergies and preferences.
Technologies: Java, Symfony, JavaFX, MySQL.

EDUCATION

2021–2026 **Engineering Degree – ESPRIT Private School of Engineering and Technology (Ariana)**
Computer Engineering – specialization in Financial Engineering

2017–2021 **Lycée Les Pères Blancs – Tunis**
High School Diploma in Engineering Sciences.

LANGUAGES

Arabic Mother tongue
French B2 – Professional
English B2 – Professional
Spanish A2 – Basic knowledge

SKILLS

Programming Languages: Python, R, Java, C/C++, C#, JavaScript, TypeScript
Web & Frameworks: Angular, React, Spring Boot, ASP.NET, Symfony, Flask
Databases & Big Data: SQL, MongoDB, MySQL, Databricks, PySpark
AI & Data Science: Data preprocessing, Predictive modeling
Finance & Insurance: Risk management, Portfolio management
Cloud & DevOps: AWS, Docker, CI/CD, GitHub Actions
Tools: Linux, Jupyter, VS Code, IntelliJ, Postman
Design & Modeling: UML, Software architecture

SOFT SKILLS

Teamwork Communication Problem Solving Adaptability Time Management

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations	AWS Academy	2025
Blockchain Essentials	IBM SkillsBuild	2025
C SDG – Computing for Sustainable Development Goals	Cisco Networking Academy	2025
